## Index to Volume 99

Aggregation model of channel gating, charge immobilization linked to inactivation in, 249
AIDA, M., NAGATA, C., OHMINE, I. and MOROKUMA, K., *Ab initio* molecular orbital study on the thermostability of extreme thermophile tRNA: role of the base stacking, 599
Alkylating agents, the derivation of quantitative correlations between skin sensitization and physio-chemical parameters for; application to experimental data for sultones, 807
Amino acid hydrophobicity parameters, the structural dependence of, 629
Animal virus replication, does the cytoskeleton play a significant role in?, 173
Arborescences, binary, natural, principles and methods of the graph-theoretical analysis of, 509
Architecture, specific, of a cell, a general mechanism for maintaining the, with an implication for the function of a small RNA, 9
Asp 102-His 57 couple in the active site of bovine pancreatic $\beta$-trypsin, the $pK_a$ value of; a molecular orbital study, 759
Asymmetry, physical, and the origin of optical purity, 285

Base stacking role in *ab initio* molecular orbital study on the thermostability of extreme thermophile tRNA, 599
BARRETT, T. W., Energy transfer and molecular switching II. Muscle contraction and enzymatic reactions, 293
BAUMANN, G. and EASTON, G. S., Charge immobilization linked to inactivation in the aggregation model of channel gating, 249
BERLIN, R. D. and OLIVER, J. M., The movement of bound ligands over cell surfaces, 69
Bineme model, foundation of; eukaryote chromosome structure, 135
Biology, structure and macroscopic chaos in, 111
BISSELL, M. J., HALL, H. G. and PARRY, G., How does the extracellular matrix direct gene expression?, 31
Body fluid regulating system in dog, mathematical simulation of, 203
Bound ligands, their movement over cell surfaces, 69
Bovine pancreatic $\beta$-trypsin, the $pK_a$ value of His 57-Asp 102 couple in the active site of; a molecular orbital study, 759
BROWN, J. S., SANDERSON, M. J. and MICHOD, R. E., Evolution of social behaviour by reciprocation, 319

$Ca^{2+}$, role in the formation of an excitable membrane on the surface of a protoplasmic droplet of *Nitella*, 461
Ca-ATPase of sarcoplasmic reticulum, a possible mechanism for, 645
Catalysis: does the coupling between conformational fluctuation and enzyme catalysis involve a true phase transfer catalysis?, 21

Catalysis: transient intermediates, fast "equilibria" and the rate of enzyme catalysis, 309
Cell, a general mechanism for maintaining the specific architecture of, with an implication for the function of a small RNA, 9
Cell surface, the effect on migration of charged membrane components of electric field induced perturbation of the distribution of ions near, 377
Cell surfaces, the movement of bound ligands over, 69
Cell type, non-random sister chromatid segregation by, 427
Cells, single, global patterning in, 119
Cerebellum, questions in modeling the, 81
Channel gating, charge immobilization linked to inactivation in the aggregation model of, 249
Chaos, macroscopic, and structure in biology, 111
Charge immobilization linked to inactivation in the aggregation model of channel gating, 249
CHARTON, B. I. (see CHARTON, M.), 629
CHARTON, M. and CHARTON, B. I., The structural dependence of amino acid hydrophobicity parameters, 629
Chirility, selective, and the origins of life, 101
Chromatid segregation, sister, non-random, by cell type, 427
Chromosome inversion problem, 1
Chromosome structure, eukaryote; foundation of the bineme model, 135
CLARKE, C. H., Hypothetical stages in the mutational evolution of the present-day genetic code from its RNY, comma-free ancestor, 397
COMINS, H. N. and FARQHAR, G. D., Stomatal regulation and water economy in crassulacean acid metabolism plants: an optimization model, 263
Conformational fluctuation and enzyme catalysis, does the coupling between them involve a true phase transfer catalysis?, 21
Crassulacean acid metabolism plants, stomatal regulation and water economy in; an optimization model, 263
Cultural inheritance of reproductive compensation, effect on the incidence of a sex-linked lethal disease, 389
Cytoskeleton, does it play a significant role in animal virus replication?, 173

Disease, lethal, six-linked, effect of cultural inheritance of reproductive compensation on the incidence of, 389
Dog, mathematical simulation of the body fluid regulating system in, 203
DOUGLAS, M. E. and ENDLER, J. A., Quantitative matrix comparisons in ecological and evolutionary investigations, 777
Dual recognition systems of T lymphocytes: a model (letter), 827

EASTON, G. S. (see BAUMANN, G.), 249
Ecological and evolutionary investigations, quantitative matrix comparisons in, 777
Ecosystem succession, nutrient cycling and output–input ratios, 479
Efficiency of electron transport processes, 341
Electric field induced perturbation of the distribution of ions near the cell surface, effect on migration of charged membrane components, 377
Electron transport processes, efficiency of, 341
Encephalization in mammals, a two-component theory of, 571

ENDLER, J. A. (see DOUGLAS, M. E.), 777
Energy transfer and molecular switching. Muscle contraction and enzymatic reactions, 293
Enzymatic reactions and muscle contraction; energy transfer and molecular switching, 293
Enzyme catalysis and conformational fluctuation, does the coupling between them involve a true phase transfer catalysis?, 21
Enzyme catalysis, transient intermediates, fast "equilibria" and the rate of, 309
Enzymes, cooperative, the dependence of flux, sensitivity and response of the flux on the concentrations of substrate and modifiers for, 491
"Equilibria", fast, transient intermediates and the rate of enzyme catalysis, 309
ERRATUM, 405
Eukaryote chromosome structure: foundation of the bineme model, 135
Evolution, instructive, TIMA-based, of macromolecules and organs and structures, 609
Evolution, mutational, of the present-day genetic code from its RNY, comma-free ancestor, hypothetical stages in, 397
Evolution of social behavior by reciprocation, 319
Evolutionary and ecological investigations, quantitative matrix comparisons of, 777
EWENS, W. J. (see WATTERSON, G. A.), 1
Excitable membrane formation on the surface of a protoplasmic droplet of *Nitella*, role of $CA^{2+}$ in, 461
Excitation, membrane, molecular events that underlie, 87
Extracellular matrix, how does it direct gene expression?, 31

FAJSZI, CS., Origin of optical purity: the role of physical asymmetry, 285
FARQHAR, G. D. (see COMINS, H. N.), 263
FINN, J. T., Ecosystem succession, nutrient cycling and output–input ratios, 479
Flux, sensitivity and response of the flux, dependence on the concentrations of substrate and modifiers for cooperative enzymes, 491
FRANKEL, J., Global patterning in single cells, 119
FUJITA, M., Bioassembly lines: a general mechanism for maintaining the specific architecture of a cell, with an implication for the functions of a small RNA, 9
Functional versus structural organization; on the origin of a self-organizing system, 15

Gating, channel, charge immobilization linked to inactivation in the aggregation model of, 249
Gene expression, how is it directed by the extracellular matrix?, 31
Genes, are individuals really subordinated to? A theory of living entities, 357
Genetic code, present-day, hypothetical stages in the mutational evolution of, from its RNY, comma-free ancestor, 397
Genetics, population, geographical invariance in, 159
Geographical invariance in population genetics, 159
GETZ, W. M., An analysis of learned kin recognition in hymenoptera, 585
Gierer–Meinhardt model, numerical simulations of hydra head regeneration using a proportion-regulating version of, 681
GLASSER, J. W. and PRICE, H. J., Niche theory: new insights from an old paradigm, 437

Global patterning in single cells, 119
Globular proteins, on the computation of the tertiary stucture of; inter-residue distances and computed structures, 705
GOEL, N. S., ROUYANIAN, B. and SANATI, M., On the computation of the tertiary structure of globular proteins. III. Inter-residue distances and computed stuctures, 705
Graph-theoretical analysis of natural binary arborescences, principles and methods of, 509

HALL, H. G. (see BISSELL, M. J.), 31
HALL, T. E. (see WATTERSON, G. A.), 1
HAMADA, T., Stationary scar-class stucture of populations of *Schizosaccharomyces pombe* (letter), 835
HAMADA, T. and NAKAMURA, Y., On the oscillatory transient stage stucture of yeast population, 797
HARTE, J., Modeling lake-water mineralization processes, 553
HAUKIOJA, E., Are individuals really subordinated to genes? A theory of living entities, 357
His 57-Asp 102 couple in the active site of bovine pancreatic $\beta$-trypsin, the $pK_a$ value of; a molecular orbital study, 759
hnRNA production, on the control of, 407
HOFMAN, M. A., A two-component theory of encephalization in mammals, 571
Hydra head regeneration, numerical simulations using a proportion-regulating version of the Gierer–Meinhardt model, 681
Hydrophobicity parameters, amino acid, the structural dependence of, 629
Hymenoptera, an analysis of learned kin recognition in, 585

Individuals, are they really subordinated to genes? A theory of living entities, 357
Information in the signal peptide? (letter), 831
Inheritance, cultural, of reproductive compensation, effect on the incidence of a sex-linked lethal disease, 389
Intermediates, transient, fast "equilibria" and the rate of enzyme catalysis, 309
Ion distribution near the cell surface, the effect of electric field induced perturbation of, on migration of charged membrane components, 377
ITO, M., Questions in modeling the cerebellum, 81
IWASA, K. and TASAKI, I., Molecular events that underlie membrane excitation, 87
